· **Environmental release category** ERC10a Widespread use of articles with low release (outdoor)

· **Application of the substance / the mixture**

Dispersion paint/ Latex paint

JUBIZOL UNIGRUND is an aqueous dispersion of acrylic binders, filled with quartz sand, for the coating of all kinds of wall substrates – especially basecoats of external wall insulation systems – before the application of acrylic, silicone and silicate render finishes.

The coating colours the substrate and equalises it regarding water absorption. It increases slightly the water repellence and binds dust and other particles which could not be removed by cleaning. It extends the workability of the freshly installed render finish and increases the adhesion on plane and low absorptive substrates.
